Short Biography

Taiki Todo is an assistant professor of Graduate School of Information Science and Electrical Engineering (ISEE), Kyushu University. He obtained masters and Ph.D. degrees of Information Science at Kyushu University, in 2010 and 2012, respectively. His main research field is multi-agent systems, a subfield of artificial intelligence. His research interest lies at the intersection between computer science and game theory, especially mechanism design, i.e., designing incentive mechanisms for various market situations such as auctions, barter exchange, school choice and voting. He is serving as a senior program committee member of both AAAI'21 and IJCAI'21, invited to give an Early Career Spotlight Talk at IJCAI-PRICAI'20, and selected as a Senior Member of IPSJ in 2020.
